Office cabs for the whole team, paid from one wallet.

A manager books pickups and drops for many employees at once. People on the same route share one cab with several stops. Every employee sees their driver, plate and OTP, and every rupee and every ride is tracked live.

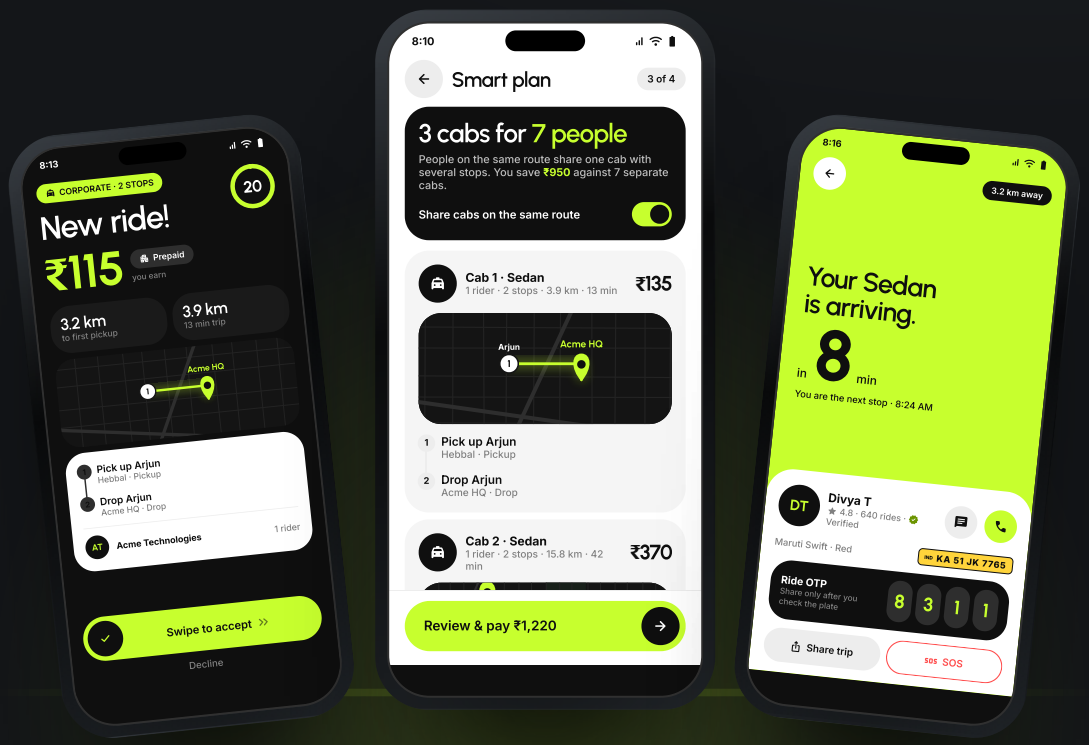

Manager · Employee · Driver apps

Owner console

Multi-stop pooling

Prepaid wallet

SOS on every ride

THE PLATFORM

Four products that run one office commute, built on the tested Bingo engine.

Companies prepay a wallet. Managers book. Employees ride. Drivers earn. You, the operator, collect at the moment of booking and pay drivers when they ask. Every step sends the right notification to the right person.

A

Manager app

Adds the team, books pickups and drops for many people in one go, schedules rides ahead or every weekday, pays from the company wallet and tracks every cab live.

B

Employee app

Shows the booked cab with driver name, rating, vehicle, plate, OTP, arrival time and stop order. SOS, trusted contact and "I'm home safe" on every ride.

C

Driver app

Corporate ride requests with the full stop list, OTP check at each pickup, earnings credited at drop-off and withdrawals on request.

D

Owner console

Your company's control room: live fleet, rides, client companies, drivers, payouts, revenue, ads and the safety desk.

E

HALO, end to end

Branding, city setup, integrations, security checks, QA, store launch, hosting and ongoing care. You own the brand, the data, the accounts and the customer relationships.

7 people

Booked in one go and grouped into 3 cabs, saving ₹950 against separate cabs in the demo.

₹0 to pay

For the employee. The company wallet pays and the receipt says so.

1 tap

For SOS, which alerts the manager, your safety desk and the rider's trusted contact together.

ONE RIDE, END TO END

From wallet top-up to the driver's bank account.

01 Company joins — OWNER CONSOLE

You onboard the company with its admin's mobile number. The admin signs in with that number and an OTP. No passwords anywhere.

02 Team is added — MANAGER APP

One by one, by spreadsheet upload or with a company code and QR. Employees sign in with the same number, are linked automatically and add their own pickup point and emergency contact.

03 Wallet is topped up — MANAGER APP

By UPI, net banking, card or bank transfer. Low-balance alerts and optional auto top-up keep rides from being blocked.

04 Rides are booked and paid — MANAGER APP · OWNER CONSOLE

Pick a trip type, the people and a time, now or scheduled. The smart plan groups same-route riders into multi-stop cabs. Paying moves the fare from the wallet to you at once.

05 Drivers are dispatched — DRIVER APP

The nearest verified driver with enough seats gets the request and 20 seconds to accept, otherwise it moves to the next. Scheduled rides are assigned 20 minutes before pickup.

06 Pickups with OTP, drops with proof — ALL APPS

Each rider shares a 4-digit OTP to board. Stops follow the planned order and the night safety rule. Manager, rider and owner see every pickup and drop live.

07 Driver is paid — DRIVER APP

At drop-off the driver's share lands in their Bingo wallet. They request a withdrawal any time and you get notified.

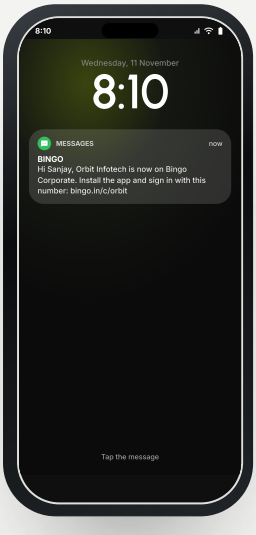

08 You pay out — OWNER CONSOLE

Approve one or all requests. The money goes to the driver's UPI or bank through the payout gateway, and both sides see each step.

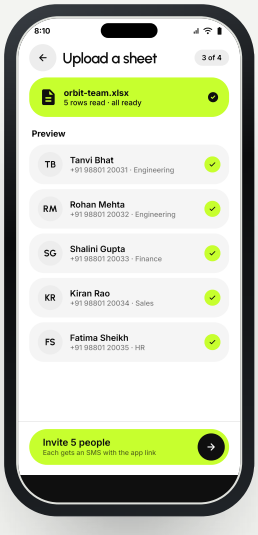

GETTING EVERYONE IN

From one SMS to a team that can ride.

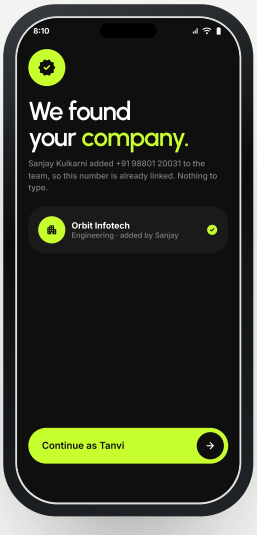

Nobody fills long forms and nobody needs a password. Each person is invited by phone number, signs in with an OTP and is linked to the right company automatically.

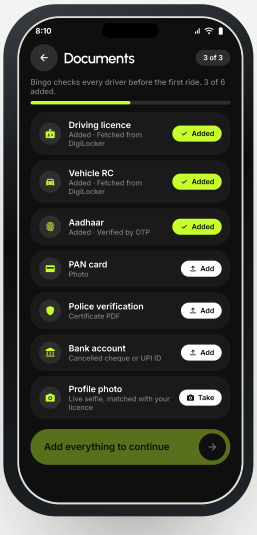

1 · MANAGER GETS AN SMS

2 · UPLOADS THE TEAM SHEET

3 · EMPLOYEE IS LINKED

4 · DRIVER ADDS DOCUMENTS

COMPANY · 1 MIN

You create the company

Company name and the admin's mobile number in the console. Bingo sends the admin an SMS with the app link.

→

MANAGER · 2 MIN

Manager sets up

Signs in with the OTP, adds GST details, picks the office and shifts, uploads the team sheet and tops up the wallet.

→

EMPLOYEE · 1 MIN

Employee joins

Gets an SMS, signs in with the same number and is linked at once. Sets a pickup point and an emergency contact.

→

DRIVER · 10 MIN

Driver is verified

Signs up with vehicle details and six documents. You verify each one in the console, approve, and the driver goes online.

Onboard companies Companies

Create the company and its admin by phone number. See team size, rides and wallet balance for each client.

Approve drivers Drivers

Review licence, RC, ID and police verification before a driver can go online. Suspend in one click.

Follow the money Revenue

A full ledger of bookings, refunds and payouts, with commission and ad revenue shown separately.

Set the rules Settings

Commission, fare table per vehicle, dispatch timing and the safety rules that apply to every company.

EVERYTHING INCLUDED

Every feature, in every app.

All four products come in every package, under your brand. Features marked ◦ connect to your own provider accounts at launch.

MANAGER APP

- Phone number and OTP sign-in ◦
- Add people one by one, by spreadsheet, by company code or QR, or from your HR system
- Join requests to approve
- Trip types: pick up to office, drop home, custom trips to airports and events
- Book many people at once, filtered by team
- Smart plan: same-route riders share one multi-stop cab, with the savings shown
- Split any shared cab into separate cabs
- Leave now, schedule ahead, or repeat every weekday
- Prepaid company wallet: UPI, net banking, card, bank transfer ◦
- Low-balance alerts and auto top-up
- Live tracking of every cab and rider
- Cancel before pickup for a full refund
- Spend reports by team, GST invoices, Excel export
- Company safety rules and SOS alerts

EMPLOYEE APP

- Linked to the company by phone number, nothing to type
- Sets own pickup point and emergency contact
- Notified at booking, driver assigned, arriving, at the gate, trip start and drop
- Driver name, rating, verified badge, vehicle and plate
- 4-digit ride OTP
- Live arrival time and pickups ahead
- Stop order and co-riders
- "I can't make it" message to the manager
- SOS, share trip, trusted contact
- Masked calls and chat with the driver ◦
- "I'm home safe" on night rides
- Rate the driver, report a problem
- Trip history, all paid by the company

DRIVER APP

- Sign-up with licence, RC, Aadhaar, police check and bank details
- Approval before first ride
- Go online or offline
- Corporate requests with every stop and the driver's own earning
- Swipe to accept, 20-second timer
- Turn-by-turn navigation ◦
- OTP check per rider, no-show marking
- Earnings credited at drop-off. Drivers see only what they earn, never the company's fare or your commission
- Withdraw all or part to UPI or bank, tracked to paid
- Weekly earnings chart and trip list
- Emergency line to the safety desk

OWNER CONSOLE · WEB

- Live overview: money received, live rides, drivers online, payouts waiting, ad revenue
- Live fleet map and activity feed
- Rides: filter, open, cancel and refund
- Companies: onboard by phone number, see wallets
- Drivers: approve documents, suspend
- Payouts: approve one or all, reject with refund to wallet
- Revenue ledger with commission and ads
- Ads in 11 places: upload, choose placements, switch on and off, impressions and clicks
- Sponsored offers and cab branding campaigns
- Safety desk: SOS map, timeline, call, close
- Your commission, set by you and changeable any time
- Fares and dispatch settings
- Team accounts for your staff

◦ Connected to your SMS, payment, maps, calling and push accounts at launch

QUICK START

Six steps for each person who uses it.

Manager

1. **Sign in** with the mobile number your company registered and the OTP.
2. **Add your team** under Team: one person, a spreadsheet, or share the company code.
3. **Add money** to the company wallet from the home screen.
4. **Book rides**: choose the trip type and time, select people, check the smart plan, pay.
5. **Track** every cab under Rides. Cancel a cab before pickup and the fare comes back.
6. **Review** spend in Reports and download the monthly GST invoice from Wallet.

Employee

1. **Install the app** from the invite SMS and sign in with your work mobile number.
2. **Confirm your company**, set your pickup point and add an emergency contact.
3. **Wait for the notification** when your manager books you. Driver details follow.
4. **Check the plate** when the cab arrives, then share your OTP to board.
5. **Follow the trip** live. Press SOS any time you feel unsafe.
6. **Rate the driver**, and tap "I'm home safe" after a night drop.

Driver

1. **Sign up** with your mobile number and upload licence, RC, ID and bank details.
2. **Get approved** after the documents and police check are verified.
3. **Go online** from the home screen with a swipe.
4. **Swipe to accept** a request within 20 seconds. It shows every stop and your earning.
5. **Drive stop by stop**: check each rider's OTP at pickup, confirm each drop.
6. **Withdraw** your earnings from Earnings whenever you like.

Owner (your team)

1. **Onboard a company** under Companies with its admin's mobile number.
2. **Approve drivers** under Drivers once their documents are checked.
3. **Watch the city** on Overview: money in, live rides, drivers, alerts.
4. **Pay drivers** under Payouts when withdrawal requests come in.
5. **Sell ad space** under Ads: upload, choose placements, publish.
6. **Answer every SOS** on the Safety page: call, follow, close.

DUTY OF CARE

Every ride is watched over, by three people at once.

FOR EVERY RIDER

- Drivers are ID-checked and police-verified before their first ride
- Name, rating, vehicle and plate shown before pickup
- The trip can't start without the rider's own 4-digit OTP
- Live tracking by the manager, a trusted contact and your safety desk
- SOS on every ride screen, with a direct 112 call button
- Night rule: after 8 PM a woman is never the first pickup or last drop when a male colleague shares the cab
- Route deviation and long-stop alerts
- Masked calls: neither side sees the other's number
- "I'm home safe" confirmation after night drops

FOR THE DATA AND THE MONEY

- Phone and OTP sign-in, codes expire in 5 minutes and are rate-limited
- Every API request checks the role: manager, employee, driver or owner staff
- Fares, wallet balances and payouts are calculated on the server only
- Append-only ledger inside database transactions, so balances always add up
- Location is shared only during a ride
- Data hosted in India, encrypted in transit and at rest, with daily backups
- Built for India's Digital Personal Data Protection Act: consent, purpose limits and deletion on request
- Audit trail for every SOS, refund and payout

What happens when someone presses SOS

Within seconds: the rider's live location goes to their trusted contact by SMS, the manager gets an alert with a call button, your safety desk sees the cab on the map with the driver's details, and the driver is told to stop safely. Whoever acknowledges first is shown to the rider, and the alert stays open until someone marks the rider safe.

MONEY FLOW

Collected at booking, paid out on request.

01 · MANAGER

Tops up the wallet

UPI, net banking, card, or bank transfer to the company's own virtual account.

→

02 · BOOKING

You are paid at once

The fare moves from the wallet to your account the moment the cab is booked.

→

03 · DROP-OFF

Driver earns

The driver's earning lands in their Bingo wallet. They see only that amount, not the fare or your commission.

→

04 · REQUEST

Driver withdraws

Any amount from ₹100, to UPI or bank. You get a notification.

→

05 · PAYOUT

You approve

The payout gateway sends it. Both sides see Requested, Approved, Paid.

EXAMPLE · ONE DAY AT ACME

Wallet top-up	₹50,000
18 cabs booked	₹6,300
Paid to you at booking	₹6,300
Drivers' share, 85%	₹5,355
Your commission, 15%*	₹945

* You set the commission in the console. Drivers see only their own earning.

RULES

- Cancel before pickup: full refund to the wallet, instantly
- No-show: the cab waits, then moves on. An optional no-show fee is set per company
- Refunds and payouts are logged in the same ledger as bookings
- A daily statement and a monthly GST invoice go to each company

PAYING "DAILY"

- **Prepaid** (default): each booking is paid from the wallet as it is made, with a daily statement
- **Daily settlement** (option for trusted clients): rides run on a credit limit and the day's total is auto-debited the next morning by e-mandate

Compliance to confirm with your CA

A wallet that can only be spent on your own rides is a closed-system prepaid instrument, which RBI does not require a licence for. As the e-commerce operator, you collect and pay GST on cab rides booked through the app, and deduct TDS on payments to drivers. We set up invoices and reports for this, and your chartered accountant confirms the rates and registrations before launch.

TECH STACK

One language from phone to server, proven services for the rest.

The three apps and the console share one codebase and one design system. The server enforces every rule: fares, pooling, wallet, payouts and safety.

LAYER	WHAT WE USE	WHY IT MATTERS TO YOU
Apps	Flutter 3, Dart 3	Manager, employee and driver apps for iOS and Android, plus the web console, from one codebase.
Design system	Shared Dart package	Your brand applies once and shows the same in every app.
Server	Dart REST API with a job queue	Dispatch, scheduled rides, wallet and payouts, with a role check on every request.
Database	PostgreSQL with migrations · Redis for live locations	Transactions and an append-only ledger. Fast location updates for the live map.
Live tracking	WebSockets, with polling as fallback	Second-by-second cab positions for riders, managers and the safety desk.
Pooling and routing	Route optimiser on Google Routes or self-hosted OSRM	Groups same-route riders, orders stops and applies the night safety rule.
Maps	Google Maps Platform, Ola Maps or Mappls	Pickup pins, navigation and ETAs. Indian providers cost less at scale.
Messaging	Firebase push · SMS by MSG91 · optional WhatsApp	Every notification reaches the phone, with SMS when the app is closed or offline.
Money	Razorpay or Cashfree · RazorpayX or Cashfree Payouts	Wallet top-ups, virtual accounts for bank transfers, instant driver payouts.
Safety services	Exotel masked calling · IDfy or HyperVerge checks · DigiLocker	Private calls, verified drivers, documents pulled from the source.
Hosting	AWS Mumbai or Google Cloud Mumbai, HTTPS on your domain	Data stays in India, with backups, monitoring and alerts from day one.
Quality	Automated API tests, static analysis, crash reporting	Every release is tested against a real server before it reaches the stores.

SERVICES TO SUBSCRIBE TO

What it costs to run, each month, at three sizes.

PILOT
1–3 companies, about 300 employees, 60 cabs a day, 25 drivers.

GROWTH
About 10 companies, 2,500 employees, 450 cabs a day, 150 drivers.

SCALE
About 40 companies, 10,000 employees, 1,800 cabs a day, 600 drivers.

SERVICE	TYPICAL PROVIDERS	HOW IT'S CHARGED	PILOT	GROWTH	SCALE
Cloud server, database, backups	AWS, Google Cloud, DigitalOcean	Monthly, by size	₹3,000	₹15,000	₹60,000
Maps, routing and ETAs	Google Maps, Ola Maps, Mappls	Per API call, free tier first	₹1,500	₹18,000	₹65,000
SMS: OTPs and ride alerts	MSG91, Gupshup	~₹0.20–0.25 per SMS, DLT	₹1,500	₹10,000	₹40,000
Masked calling	Exotel, Knowlarity	Plan + ~₹0.6–1 per minute	₹3,000	₹12,000	₹40,000
Driver payouts	RazorpayX, Cashfree Payouts	~₹3–6 per payout	₹2,000	₹15,000	₹50,000
Driver verification	IDfy, HyperVerge, AuthBridge	~₹300–800 per new driver	₹6,000	₹18,000	₹60,000
Wallet top-up collection	Razorpay, Cashfree	~₹5–15 per bank transfer · ~2% on cards	₹500	₹2,000	₹6,000
Support desk and WhatsApp	Freshdesk, Zoho Desk, WhatsApp API	Per agent and per conversation	₹1,500	₹8,000	₹30,000
Monitoring and crash reports	Sentry, Firebase Crashlytics	Free tier, then monthly	₹0	₹2,500	₹8,000
Email, domain, app stores	Amazon SES, registrar, Apple, Google	Apple $99 a year · Google $25 once	₹800	₹1,300	₹2,800
Push notifications	Firebase Cloud Messaging	Free	₹0	₹0	₹0
Total per month		**about**	**₹19,800**	**₹1,01,800**	**₹3,61,800**

DOES IT PAY? WHAT YOU KEEP EACH MONTH

SIZE	CABS A MONTH	RIDES BOOKED, AT ₹350 A CAB	YOUR COMMISSION (15%)	AD INCOME*	RUNNING COSTS	YOU KEEP
Pilot	1,800	₹6,30,000	₹94,500	₹15,000	− ₹19,800	₹89,700
Growth	13,500	₹47,25,000	₹7,08,750	₹1,35,000	− ₹1,01,800	₹7,41,950
Scale	54,000	₹1,89,00,000	₹28,35,000	₹5,00,000	− ₹3,61,800	₹29,73,200

How to read this: companies pay you the full fare when they book. You keep your commission and pay the rest to drivers. You set the commission yourself in the console; 15% is used here as an example. "You keep" is before staff, office and marketing costs. * Ad income assumes about 60% of ad space sold (page 15). Service prices are indicative, from providers' published rates in 2025–26 before GST, and each provider bills you directly.

AD REVENUE

Ten ways to earn from ads, priced by who sees them.

Employees are a salaried, office-going audience, drivers are full-time vehicle owners and managers make company buying decisions. Every placement below is live in the demo and is sold from the Ads page of the console.

PLACEMENT	GOOD ADVERTISERS	VIEWS / MONTH*	SUGGESTED PRICE	MONTH, ALL SOLD
Opening screen · all three apps	Banks, telecom, big consumer brands	2,03,500	₹40,000 flat, one sponsor	₹40,000
Employee · home	Food, phones, fitness, banking	82,500	₹200 CPM	₹16,500
Employee · finding a driver	Quick offers while they wait	26,400	₹250 CPM	₹6,600
Employee · trip complete	Food delivery, offers near the office	26,400	₹300 CPM	₹7,920
Employee · my trips	Travel, gyms, events	15,000	₹150 CPM	₹2,250
Manager · home, booking confirmed, reports	Corporate cards, insurance, office supplies	6,000	₹25,000 flat package	₹25,000
Driver · home	Fuel, tyres, vehicle loans	1,17,000	₹80 CPM	₹9,360
Driver · trip complete and earnings	Insurance, savings, phones	31,200	₹100 CPM	₹3,120
Sponsored offers by notification	One offer a week to every employee	10,000	₹1,000 per 1,000 sent	₹10,000
Cab branding · rear window and doors	75 cabs at ₹2,000, minus ₹600 to each driver	–	₹1,400 per cab you keep	₹1,05,000
Total, all space sold				**₹2,25,750**

* At the Growth size: 10 companies, 2,500 employees, 1,200 seats a day, 150 drivers, half the cabs branded. CPM is the price per 1,000 views. Plan on about 60% of space sold in the first year, about ₹1.35 lakh a month.

WAYS TO SELL

- **Per 1,000 views** for brands buying reach. The console counts views and clicks
- **Flat monthly sponsorship** for one owner of a placement
- **Cab branding** by the car, with a monthly share for the driver
- Package deals: opening screen plus offers plus branding for one brand

HOUSE RULES THAT PROTECT THE PRODUCT

- No ads on live trip, SOS or safety screens, ever
- Each ad is shown at most 3 times a day to the same person
- Every ad is approved in the console and follows the ASCI code
- A company can keep its employees ad-free for a small fee

THE LAUNCH PATH

From signed proposal to the first office commute.

01 Brand the product — HALO · WITH YOUR INPUT

Your name, logo and colours across all three apps and the console, plus icons, splash screens and store artwork.

02 Configure your city — HALO · YOU APPROVE

Vehicle types, fare table, commission, safety rules, offices and venues, support contacts, terms and privacy policy.

03 Connect your services — YOUR ACCOUNTS · HALO CONNECTS

SMS with DLT registration, payments and payouts, maps, masked calling, driver verification and push notifications, all in your name.

04 Stand up the server — HALO

Production server in your cloud account in India, with HTTPS on your domain, backups, monitoring and console accounts for your team.

05 Publish the apps — HALO · YOUR DEVELOPER ACCOUNTS

Manager, employee and driver apps to Google Play and the App Store, through internal testing and TestFlight first.

06 Pilot with a first company — YOU · HALO ON CALL

Onboard drivers, run test commutes, tune pooling and fares, then go live with the first client company.

Your client's commute. Your brand. Our engine.

Book a 30-minute call. We'll run the live demo with you and plan the launch for your first corporate client.
